

eCutter

– hole cup cutter

FSH machines

The professional electric hole cutter

Perfecting the most valuable area on the golf course. The eCutter is designed to cut perfect and uniform cup holes.

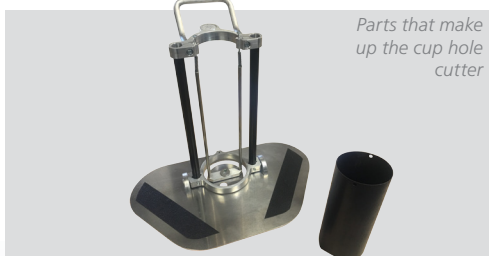

With its ergonomic design, the eCutter achieves easily the highest professional standards. Change the location of the cups effortlessly as often you like. The light weight body and powerful electric cutter help prevent work-related injuries.

The eCutter is equipped with a footplate which protects the green. The integrated guiders prevent »volcano« holes contrary to a traditional hole cup cutter.

Operating the eCutter is pretty straight. Just pull the trigger to start the blade action and push the handle downwards. It's that simple. By use of very little effort, the eCutter makes it extremely easy to produce a perfect hole each time.

Parts that make up the cup hole cutter

Technical specifications

- HxWxD: 835x480x280 mm
- Weight: 9 kg
- Battery: 18v Li-ion
