

eCutter

– sprinkler cutter

FSH machines

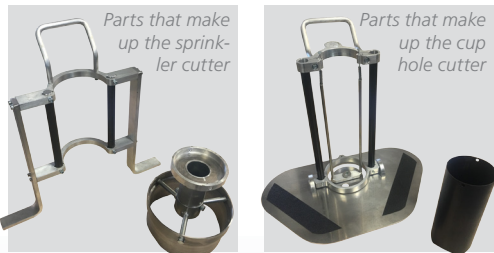

New
– the eCutter can now perform several different tasks...

With the eCutter sprinkler cutter you'll get perfectly round and razor-sharp turf cut-outs.

Removing turf from around the sprinklers ensures the best possible economic benefit and use of the advanced sprinkler systems available today.

The turf can be cut up to 10 mm from the sprinkler head and to a depth of 40 mm. Accurate and controlled cutting prevents damage to the electrical controls of the sprinkler head.

The centring tool ensures that the turf is cut perfectly in the centre so the distance to the sprinkler head exactly the same the whole way round.

Technical specifications

- HxWxD: 900x500x300 mm
- Weight: 9 kg
- Battery: 18v Li-ion
- Easy to switch from sprinkler cutter to cup hole cutter (and vice versa)

FSH machines

Trifork (centring tool)

- Simple
- Effective
- Precise
- Adjustable (from 100 to 300 mm)

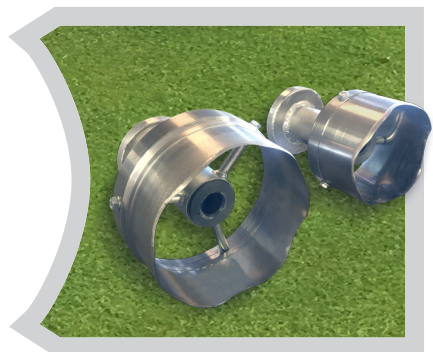

The centre viewfinder ensures that the turf is cut in the centre so that the sprinklers are not damaged by the blade.

Cutter

- Long service life
- Cut diameter from 100 to 320 mm

The cutter is made from heavy-duty materials to ensure a stable cutting action and a long-lasting service life.
